

PACKAGING SOLUTIONS

Clysar® ShrinkBox™ Threshold Application

Maximum customer appeal with premium product protection.

With the introduction of ShrinkBox, Bemis Clysar, Inc. has designed a packaging solution for threshold manufacturers that reduces packaging costs and increases productivity

Challenges

ShrinkBox has to offer the ease of palletization and stabilization that comes with more expensive die-cut, fold-and-tuck corrugated box, while also lowering the total package cost.

Benefits

- Offers a lower total cost to threshold manufacturers by automating the production process and increasing the material savings
- Greater visibility of the threshold product while retaining the same protection and tamper-resistant properties of corrugated boxes
- Packaged products are interlocked on pallets for increased stability
- Easy-to-open package that eliminated fear of damaging molding

The conclusion: ShrinkBox packaging has made palletization easier, lowered material cost, increased productivity, and provided the threshold manufacturers with a dependable packaging solution. ShrinkBox is the perfect threshold product.
